

PERTRIN S

Codice prodotto: 1430006

Category: PMC

Concentrated liquid insecticide in aqueous phase with knockdown and residual action for civil and industrial use.

Italian Ministry of Health Registration:

n. 11809

Formula:

Concentrated liquid

Description:

PERTRIN S is an odourless and non-flammable insecticide concentrate, to be diluted in water before application. It is effective against all insects in domestic, civil and industrial environments (except food industries). PERTRIN S has both a residual effect conferred by Permethrin and a knock-down and flushing effect conferred by Tetramethrin, synergised with Piperonyl Butoxide.

Method of use:

Against flies and other flying insects : dilute in water using 2% of PERTRIN S for normal infestations and as a maintenance dose, or 3% for strong infestations or to obtain a greater residual effect. Then apply the emulsion thus obtained using normal hand or mechanical sprayers, either cold or hot, on the surfaces infested by insects, distributing about 1 litre of emulsion every 15 square metres.
For outdoor treatments and in particular for the adulticidal treatment of mosquitoes, PERTRIN S can be used in percentages varying from 0.25% to 0.5% (250 – 500 ml in 100 lt of water).
Against cockroaches and other crawling insects : dilute in water using 4% of PERTRIN S, or 5% in case of strong infestations. Then apply the emulsion thus obtained using normal sprayers on the surfaces infested by insects (in particular under sinks, wall plinths, cracks, etc.), distributing about 1 litre of emulsion every 15 square metres.

User:

Professional

Warnings:

Do not contaminate foodstuffs, beverages or containers for them when using the spray. Avoid inhaling the insecticide fog during application. Do not use the product in food processing plants. If used in areas of long-term occupancy or in bedrooms, ventilate the room before returning. Do not use in concentrated form: follow the manufacturer's instructions. The product must be used by specialised personnel.

Unit of sales:

1 l bottle
Canister 5 l

Notes:

Medical Device with insecticidal action – use with caution. Always read the label and product information before use.
Attention is drawn to the hazard warnings and symbols on the label.
The text in the specifications corresponds to the label approved by the Ministry of Health.
