Dispenser for rodenticide baits and elimination of crawling insects

Description:

Container for rodenticide baits, with transparent lid, complying with all safety and hygiene rules, small in size, suitable for mice and rats in indoor and outdoor environments. Thanks to the lower drawer where the special adhesive card can be inserted, it is suitable for eliminating crawling insects. Equipped with a safety lock. Indoors, the bait can be placed in the tray or in the block holder, which can be positioned either horizontally or vertically.

Technical information:

Dimensions: 14.5 x 12 x 13 cm

Weight: 360 g

Method of use:

1. Install the dispenser along the wall using expansion nails or similar.
2. Open the lid of the dispenser using the key provided.
3. Fill with rodenticide bait and close

Once the container is secured, only mice and rats will have access to the bait.

In accordance with current safety and hygiene regulations, rodent extermination must be carried out in such a way that children, pets and unaware persons cannot come into contact with the rodenticide baits.

The use of Sicurbox Complex simplifies the checking and renewal of rodenticide baits, prolongs the palatability of the baits and protects them, thus significantly improving the effectiveness of the rodent control.

Can be used with both baits in sachets and baits in blocks.

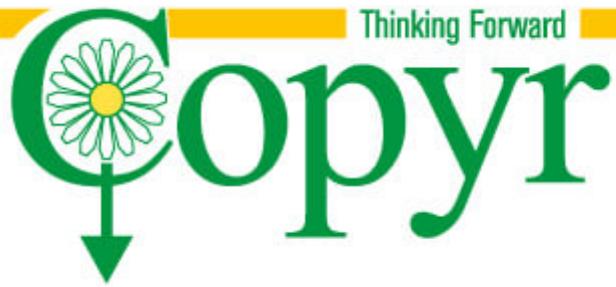

To eliminate crawling insects, place the adhesive card in the tray provided. Replace as required;
