Codice prodotto: 2530375

Category: Absent

Adhesive trap for rodents and crawling insects

Description:

Plastic trap, complying with all safety and hygiene rules, with two functions: an upper part with adhesive card for monitoring and catching mice and rats and a lower drawer, where you can insert the special adhesive card for eliminating crawling insects. A rodenticidal bait tray may be inserted. Equipped with a safety lock.

Technical information:

Dimensions: 20 x 13 cm

Method of use:

For use as part of an integrated rodent and crawling insect monitoring and control programme. It resolves the problem of rodent infestations easily, without the use of chemical rodenticides, without hazardous spring-loaded mechanisms and in a hygienic and safe manner. Fix the container along mice and rodent paths adjacent to walls, in vegetation, in open areas, under ceilings and floors, along pipes and all possible sources of water supply. Check for catches according to an established plan and at least once a week. In the event of a capture, take corrective action (pest proofing, placement of rodenticide bait, etc.) Using the provided tray, it is possible to place rodenticide bait inside the trap which, due to the special shape of the container, remains accessible only to mice and rats. In accordance with current safety and hygiene regulations, rodent extermination must be carried out in such a way that children, pets and unaware persons cannot come into contact with the rodenticide baits.
