

PERTRIN AEROSOL

Codice prodotto: 3400065

Category: PMC

Aerosol Insecticide Acaricide - household and civil use

Italian Ministry of Health Registration:

n. 19333

Formula:

Aerosol

Description:

PERTRIN AEROSOL contains two different insecticides: natural Pyrethrum, with immediate action, and Permethrin, with prolonged disinfesting power, which combine high efficacy with maximum safety of use. PERTRIN AEROSOL is formulated to ensure rapid and total control of crawling and flying insects and mites in homes.

Method of use:

Flying insects : spray for no more than 4-6 seconds, directing the spray upwards, away from people.
Crawling insects : spray uniformly on the surface to be treated, at a distance of 30 cm for no more than 4-6 seconds per square metre. The product should be sprayed away from people, directing the jet where the insects nest. If correctly used, the insecticide can remain active for up to 2 weeks.
Mites: spray the product uniformly on the surface to be treated (mattresses, blankets, bedspreads, pillows, carpets), from a distance of 30 cm for no more than about 5 seconds per square metre. Test the colour-resistance of the fabric to be treated in a hidden corner. Since dead mites also can cause allergic reactions, after treatment it is necessary to remove their remains by washing in the washing machine or vacuuming. In order to optimise treatment and avoid the proliferation of mites, it is advisable to follow a few simple rules: air the rooms frequently and let the sun in; hang linen in the open air and not in the home; expose cushions and mattresses to the open air and sun; vacuum frequently.
The product should be sprayed away from people, directing the spray where mites nest. Do not spray on animals.

User:

Professional

Warnings:

Do not contaminate foodstuffs, beverages or containers for them when using the spray. Avoid inhaling the spray directly and spraying it into the eyes. Repeat treatment only if necessary. Do not exceed the indicated quantities to avoid possible accumulation of flammable gas in the air. Do not stay in the room during treatment. If used in areas of long-term occupancy or in bedrooms, ventilate the room before returning. Do not use in the presence of open flames and do not light flames until the room has been well ventilated.

Unit of sales:

500 ml canister

Notes:

Medical Device with insecticidal action – use with caution. Always read the label and product information before use.
Attention is drawn to the hazard warnings and symbols on the label.
The text in the specifications corresponds to the label approved by the Ministry of Health.
