KENYASAFE EXTRA

Codice prodotto: 3400303

Category: PMC

Insecticide aerosol for domestic and civil use for application with Copyr automatic dispenser

Italian Ministry of Health Registration:

n. 16477

Formula:

Aerosol

Description:

KENYASAFE EXTRA aerosol is an insecticide based on natural Pyrethrum and Tetramethrin, synergised with Piperonil Butossido. Thanks to the known knockdown power of Pyrethrum extract and Tetramethrin, KENYASAFE EXTRA ensures the elimination of flying insects (flies, mosquitoes, etc.) that infest domestic and civil environments and prevents their re-infestation by virtue of the repellency of Pyrethrum. The special dosage valve dispenses a predetermined quantity of product, sufficient to ensure the control of about 180 m3 of environment. KENYASAFE EXTRA does not contain mineral solvents.
INSTRUCTIONS The canister is mechanically operated by an automatic dispenser. Place the dispenser system at least 1.80 m from the floor, in a position where the jet is directed away from people. Do not apply in the vicinity of air conditioning systems. Keep away from open flames, incandescent bodies or other sources of combustion to avoid flammability risks. Ensure there is sufficient ventilation in the room.

User:

Professional

Warnings:

Do not contaminate foodstuffs, beverages or their containers during use. Avoid inhaling the spray directly or spraying it into the eyes.

Unit of sales:

250 ml canister
