PERTRIN L

Codice prodotto: 1420050

Category: PMC

An insecticide with a flushing, knockdown and long-lasting residual action for the control of flying and crawling insects for domestic and civil use.

Italian Ministry of Health Registration:

n. 11502

Formula:

Liquids

Description:

Pertrin L is effective against a wide range of flying and crawling insects such as flies, mosquitoes, wasps, cockroaches, ants, spiders, silverfish, crickets, fleas. Thanks to its characteristics, Pertrin L can be used effectively in any civil and industrial environment: houses, warehouses, hotels, schools, shops, hospitals, homes in general, industries.

Method of use:

Pertrin L should be sprayed undiluted on the walls, floors and other surfaces of the rooms to be freed of pests, with particular emphasis on treating corners, cracks, crevices, interstices, pipes and all those points which may be sources of infestation or habitual routes for insects.
The insecticide remains active for 3 to 5 weeks depending on the conditions of use: quantity, exposure to light, type of surface treated. The product can also be applied using a mechanical sprayer.
Apply Pertrin L at a rate of 1 litre of product per 100 sq.m. in case of infestation by flying insects.
Apply Pertrin L at a rate of 1 litre of product every 75 sq.m. in case of infestation by crawling insects.

User:

Professional

Warnings:

Do not contaminate foodstuffs, beverages or their containers during use. Avoid inhaling the insecticidal fog during

application. Do not use the product in food processing plants. If the product is used in a place where people stay for a long time or in bedrooms, ventilate the room before spending any time there again.
