

FLY CONTROL ROLLER XL

Codice prodotto: 2492009

Category: Absent

Viscous tape designed for animal protection

Formula:

Ready-to-use roll

Description:

Environmentally friendly viscous tape (insecticide free) for trapping and monitoring flies and other flying insects, particularly suitable for cattle farms (stables and milking parlours), and farms with sheep, horses, pigs and poultry. Easy to use, adjustable to suit the area to be monitored and fitted with support for ceiling and wall mounting.

Technical information:

Total length of tape: 9 m
Tape width: 0.3 m
Duration of tape: 6 to 8 weeks

Method of use:

VERTICAL POSITIONING : hang the tape on a nail or hook. Unroll 30-50 cm of the adhesive surface. When the sheet is covered with insects, unroll another 30-50 cm; roll up the part already used and remove it using a sharp knife or scissors.
HORIZONTAL POSITIONING : hang the roll on a nail or hook. Unwind the roll to the desired size and fix it firmly at the end. Replace it as soon as it is completely covered with insects.
