

Flykiller tape roll - 700 m kit

Category: Absent

Professional ecological fly tape roll with installation kit

Description:

Viscous tape designed for animal protection. Glue active on 100% of the unrolled tape. Made without toxic substances, it allows high concentrations of capture of up to 500 flies per metre. The system is easy to install and the product quickly leads to a drastic reduction in the number of flies present.

Method of use:

The device, equipped with an installation kit, must be positioned along walls and near the ceiling. Once all the adhesive tape has been used, only the reel needs to be replaced.

User:

Professional

Warnings:

If there are bird nesting sites (e.g. swallows) within the building it is recommended that the system be installed carefully, at a sufficient distance so that the system does not pose a risk to the birds. It is recommended that the system be installed at a height above the reach of children.

Unit of sales:

the kit contains: 1 bracket, 1 reel with adhesive tape (700m), 1 empty reel and accessories (screws, dowels and pulleys for fixing).
